

THE WORK COLLEGE
Recruitment
By School of Coding

School of Coding & AI

// : Building_better_futures_through_code

Summary

School of coding was founded in 2017 and is now the UK's largest multi award winning computer science and coding education company teaching thousands of students each month. Working with hundreds of schools, colleges and businesses each year, delivering Coding, Computer Science, A.I. and Cyber Security lessons.

We help governments across the UK and 11 European countries to build strategies and methodologies to implement tech education into schools, youth and adult education. This helps countries become more innovative and reduces unemployment, whilst building the workforce for the future.

UK Offices : Wolverhampton UK, Telford UK, Shrewsbury UK

International Offices: Dublin Ireland, Mumbai India

Teaching thousands of students each month.

Teachers trained all year round.

People placed into work every week via The Work College.

What we do?

In Shropshire, we are currently delivering two different projects.

Project 1: E36

We are currently engaging with high numbers of people across the area, where we are delivering six workshops including Essentials Digital Skills, Essentials Skills for Life, Digital Marketing and Web Development, Intro to Coding, Cyber Safety and Digital Money Skills giving them the chance to upskill and advance their knowledge of digital processes and useful practical skills.

Eligibility - 16+, Living in Shropshire.

Project 2: E37

This project kicked off in April gathering lots of interest, This is now fully up and running, rolling out tailored Support for the employed to access non accredited and accredited courses through different delivery providers designed to enhance the skills of individuals already in employment. These courses are intended to help these individuals advance their careers while contributing to the growth of their employers' businesses.

Eligibility - Economically active individuals living in Shropshire.
